Keine Hydraulik Keine elektrischen Schalter

Die SMART TABS sind komplett selbsteinstellend; keine Benutzereinstellung erforderlich.

Die Nitrogengasdruckdämpfer sorgen dafür, dass sich das Boot vorne nicht hebt, indem sie die Trimmklappen unten halten.

Geschwindigkeitsregulierung

Bei Beginn der Fahrt stellen sich die SMART TABS auf einen abwärtigen Winkel ein. Bei höheren Geschwindigkeiten drückt das Wasser die Trimmklappen nach oben, um das Boot wieder in eine horizontale Lage zu bringen.

Bootstabilisatoren

Selbst beim Cruisen setzen die SMART TABS ihre Arbeit fort. Sie wirken dann wie Schockabsorber. Die konstante Einstellung auf die Wasserbedingungen erlaubt den SMART TABS, beim Wenden und Wellen überqueren Stabilität in das Boot zu bringen.

Das Einzige seiner Art

Das einzigartige System ist das Einzige seiner Art in der Branche. Das eingebaute Gasdruckdämpfersystem ist einzigartig in seinem Design.

- Es erhöht die Gleitgeschwindigkeit um 33%
- Es erhöht den Fahrkomfort bei langsamer Geschwindigkeit
- Es verbessert die Wirtschaftlichkeit, das Handling und die Sicherheit

Einfache Installation

Mit einem Akkuschauber und 2 Philips-Bits kann jeder die SMART TABS in weniger als einer halben Stunde anbringen.

- Alle Montageteile und Anleitungen inkl.
- SMART TABS erfordern für die Montage kein Durchbohren!

Boat stabilizers

Even when cruising, SMART TABS continue to work like shock absorbers. The constant adjustments to sea conditions allow SMART TABS to provide remarkable stability in turns, while crossing waves, while cruising and while running at maximum speeds. No more sliding, porpoising or chine walking!

No hydraulics No electric switches

SMART TABS are completely automatic, requiring no operator adjustment while underway. The nitrogen gas actuator provides LIFT at the stern of the boat by holding the trim plate down during acceleration. The amount of LIFT is determined by the actuator load rating and the trim plate adjustment, which is done at the time of installation (see installation instructions).

Unique

This unique system is the only one of its kind in the market. The internal valve system is truly "smart" in its design for controlling your boats performance.

- Reduces the minimum planing speed by 33%
- Provides a more comfortable ride at lower speeds
- Improves economy, handling and safety

Speed regulation

SMART TABS start at a downward angle to maximize lift at slow speeds. As the boat accelerates, the water pushes up on the trim plates, providing lift to the stern, which minimizes bow rise and allows the boat to plane quickly. Once the water pressure exceeds the actuator load rating (maximum lift), the trim plates move up to a horizontal position eliminating any drag.

Speed regulation

With an electric drill, two drill bits (1/8" and 3/16"), a Phillips screwdriver and two wrenches just about anyone can install SMART TABS in less than 30 minutes.

- All mounting hardware, instructions and templates are included.
- SMART TABS require NO THROUGH HULL DRILLING

ANLEGEROUTEN als Set

Anlegerouten

Die Anlegerouten sind ein sicherer und preiswerter Weg, Ihr Boot vor kostspieligen Stegschäden zu schützen. Das Anlegeroutensystem hält das Boot in einem bequemen und sicheren Abstand zum Steg. Dabei schützt es das Boot vor Wellen-, Wind- und Gezeitschäden.

Die Anlegerouten sind aus einem soliden, hoch qualitativen Fiberglas gefertigt. Die Füße bestehen aus einer Aluminium-Magnesiumlegierung. Das Set enthält weiterhin die benötigten Anlegeleinen.

Die Anlegerouten werden als Paar verkauft. Sie können sehr einfach zum Verstauen entfernt werden.

Mooring whips

Mooring whips are an economical and safe way to protect your boat against costly dockside and seawall damage. The Mooring whips system pulls your boat a safe, convenient distance away from the dock, thereby protecting it from the damaging forces of waves, wind, tides and wakes.

Mooring whips are made of high quality solid fiberglass poles, aluminium-magnesium base units, roller tips and Mooring whip lines. Each set will be delivered with all of the hardware necessary for installation. Mooring whips and Premium Mooring whips are sold in pairs. The PWC Mooring whip is a one-pole system with a fish mount base and is commonly used on swim platforms. Whips can be easily removed for storage.

Tender- und Jetskihalter variabel, Alu

Jetskihalter variabel

Der neue Marinetech Tender- und Jetskihalter aus eloxiertem Aluminium (seewasserbeständig).

Durch diverse Verstellmöglichkeiten lässt sich der Halter optimal auf die verschiedenen Boots- und Jetskitypen einstellen.

Anstellwinkel der Auflageblöcke: 10° - 54°

Obere Öffnungsweite bei 10° 775mm - 975mm

Obere Öffnungsweite bei 54° 445mm - 645mm

Inklusive Schäkel zur Befestigung von Spanngurten.

Nutzlast pro Halter ca. 300 kg.

Schrauben zur Montage auf Plattform nicht im Set enthalten.

Jetski holder, variable

The new Marinetech tender- and Jetski holder made of anodized aluminium (seawater resistant)

The adjustable ensures an optimum holder fit with several boat and jet ski types.

Setting angle of the onlay plate 10° - 54°

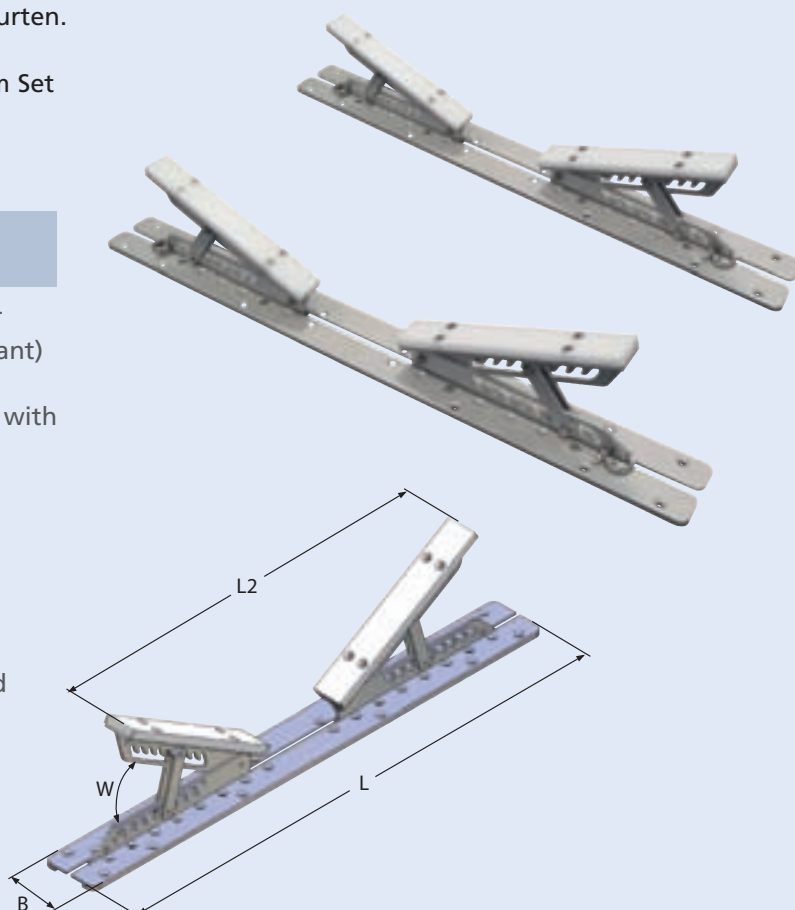

Upper opening width at 10° 775mm - 975mm

Upper opening width at 54° 445mm - 645mm

Shackles for fastening belts included.

Working load of each holder ca. 300 kg.

Screws for mounting on platform not included in set.
